What else can tell us the fEPSP?

Presynaptic Volley

Following stimulation of the SC, an extracellular recording electrode in the stratum radiatum containing synapses, would record a small negative potential that results from the action potentials generated in the presynaptic fibers (Fiber Volley, FV)

Rozas C, 2010

What else can tell us the fEPSP?

Pair pulse facilitation

A Facilitation

B Depression

What else can tell us the fEPSP?

Pair pulse facilitation in hippocampus

Rozas, C. et al, Neuropharmacology, 2015

LONG TERM POTENTIATION, LTP

The Malinow/Nicoll/Malenka model of
LTP expression

Long-term potentiation, LTP

Long-term depression, LTD
